EXPERIENCE

Voesh New York, NJ — Software Engineer

2019 - PRESENT

Used modern frontend development frameworks to build and maintain multiple sites and experiences.

Participated in the full development cycle, end-to-end, from design, implementation, testing, delivery & maintenance.

Collaborated and understood design layout from the design team.

Participated in meetings, status updated, strong reporting with project managers and other developers.

Tested frontend in multiple browsers to ensure cross-browser compatibility and all functionalities across the site and ensured everything worked as expected.

Built custom responsive sites from scratch with HTML, CSS in solid code.

Mentored and monitored software engineer interns to ensure the help they needed to deliver and meet for each task assigned.

Tech/Tools: React/Redux/Hooks, Javascript, HTML, CSS, Less, Styled-Components, Cypress, Mysql, Postman, AWS Ec2, S3, Codecommit, Codepipeline

SKILLS

React/Redux/ React Hooks,
Javascript, HTML, CSS, Less,
Java, Ruby, C++, C#,
